## Fresh Husker By Hughes

Designed To Give You Clean, High Profit Ears

The **Fresh Husker** is designed to gently and efficiently remove husks and provide ears ready for fresh market or fresh frozen sale – enhancing your profit.

The **Fresh Husker** has a capacity of 20 to 30 ears per minute, depending on variety and conditions of corn. It has excellent husking efficiency – 75 percent in ideal conditions with shanks removed. The Fresh Husker can be operated by one person. A variety of roll configurations are available, depending on your product.

Access to water, air and single phase 230V power is required (power cord not provided). A water spray helps keep the rolls clean to ensure the most efficient, continuous husking. An air manifold is supplied for producers of ready-to-eat product.

The **Fresh Husker** can be easily transported. Lockable casters keep the husker secure during use.

### THE FRESH HUSKER ALSO REMOVES

- Stems and debris from fruit (typically citrus and apples) and vines
- Tops and debris from beets, carrots, onions, potatoes and radishes

We recommend genuine Hughes Equipment replacement parts. Contact your Hughes Equipment representative or see us online at [www.hughesequipment.com](http://www.hughesequipment.com).

\*\*Hughes Equipment Company now accepts Master Card and Visa and has financing/leasing options available for US and Canadian customers.

### FRESH CUTTER BY HUGHES

The **Fresh Cutter By Hughes** is the perfect complement to the **Fresh Husker** for your corn processing needs – giving you additional high value crop return. The **Fresh Cutter** is a manually fed unit that can cut up to 100 ears per minute. It operates on single phase 230V power and has many great features that make smaller volume corn cutting very efficient.
