Fresh Cutter By Hughes

INCREASE YOUR CORN PROFIT!

Boost the profitability of your sweet corn processing with the *Fresh Cutter* – the ideal companion of the innovative and complementary *Fresh Husker*.

Sweet corn growers and processors will increase revenue by using the *Fresh Cutter* in many applications.

1. The usual 10 to 30 percent of husked ears that have cosmetic imperfections can now be efficiently cut for fresh or frozen kernel sales or other higher end use. With the Fresh Cutter, you'll significantly reduce labor costs and get more high quality, saleable product.
2. This is the ideal machine for commercial operations that need a cutter with fewer features.

Once again, your strategic partners at Hughes Equipment Company have come through with a product that will give you a greater return on your operation.

Fresh Cutter By Hughes

Designed For Quick, Clean Cutting

We designed the *Fresh Cutter By Hughes* to give sweet corn growers and processors the power to cut more with less labor and more precision – leading to greater profitability from your product.

The *Fresh Cutter* can handle up to 100 ears per minute under normal operating conditions. The system feeds the husked ear into the cutter, removing kernels quickly and efficiently. Totes are needed for the separate collection areas for kernels and cobs.

The unit cuts with a rotating knife head with a set of six knives that provide precisely cut, clean kernels with high market value.

The cutter has a spray nozzle for flushing and lubricating the cutter head. Connect to a standard water supply.

We recommend genuine Hughes Equipment replacement parts. Contact your Hughes Equipment representative or see us online at www.hughesequipment.com.

**Hughes Equipment Company now accepts Master Card and Visa and has financing/leasing options available for US and Canadian customers.

FRESH HUSKER BY HUGHES

Extend your operation's efficiency with the innovative *Fresh Husker By Hughes*, the perfect complement to the *Fresh Cutter By Hughes*. This manually fed unit, built at the similar smaller size as the *Fresh Cutter*, will easily remove husks from sweet, seed and fresh market corn, and can handle 20 to 30 ears per minute.

FRESH CUTTER SPECS

Dimensions	62" L x 44" W x 55" H
