Hughes Equipment Plans More For You

One year ago I joined Hughes Equipment Company as an owner and president - renewing our commitment to be your strategic partner in food processing.

It's been a great year with many accomplishments to serve you better than ever.

We introduced the PACIR™ processing plant operations audit system to help you ensure your facilities are running at peak productivity.

We strengthened our staff with key hires in engineering, manufacturing operations and customer service.

We strengthened our relationships with our many sales reps throughout the world.

We introduced new products, such as our innovative Fresh Husker and Fresh Cutter for processors serving the fresh market but without the need for large capacity units.

We continue to innovate, and will soon announce an addition to our food processing equipment lineup that will raise profitability at many operations. (See adjacent story.)

It's been great meeting many of you at trades shows throughout the U.S. and through processing facility visits throughout the world.

I'd like to thank all of you for continuing to rely on Hughes Equipment Company as your trusted source for food processing equipment, parts and service! We promise not to let up on our commitment to you.

Sincerely,

Ross Lund, President
